An Android App Bundle is a new upload format that includes all your app's compiled code and resources, but defers APK generation and signing to Google Play.. Google Play's new app serving model, called Dynamic Delivery, then uses your app bundle to generate and serve optimized APKs for each user's device configuration, so they download only the code and resources they need to run your app.

### **About Android App Bundles | Android Developers**

Apps provide multiple entry points. Android apps are built as a combination of components that can be invoked individually. For example, an activity is a type of app component that provides a user interface.. The "main" activity is what starts when the user taps your app icon, but you can take the user straight into a different activity from other places, such as from a notification or even ...
