Biochemistry is a common university textbook used for teaching of biochemistry. It was initially written by Professor Lubert Stryer and published by W. H. Freeman in 1975. It has been published in regular editions since. It is commonly used as an undergraduate teaching textbook or reference work.

Biochemistry (Stryer) - Wikipedia

Stryer's biochemistry is a very well-known text in the field. This book contains hundreds of topics but the author explains them so concisely and understandably. It may not be a good text book for a beginner to start learning some biochemistry language (I recommend Lehninger's for this purpose) but for someone in the field, this text can serve ...

Lubert Stryer - Wikipedia

Biochemistry is the study of the chemistry of life processes. Since the discovery that biological molecules such as urea could be synthesized from nonliving components in 1828, scientists have explored the chemistry of life with great intensity. ! Furthermore, we are now in an age of unprecedented opportunity for the
