In biochemistry, a metabolic pathway is a linked series of chemical reactions occurring within a cell. The reactants, products, and intermediates of an enzymatic reaction are known as metabolites, which are modified by a sequence of chemical reactions catalyzed by enzymes.: 26 In most cases of a metabolic pathway, the product of one enzyme acts as the substrate for the next.

Current Opinion in Immunology. Current Opinion in Immunology aims to stimulate scientifically grounded, interdisciplinary, multi-scale debate and exchange of ideas. It contains polished, concise and timely reviews and opinions, with particular emphasis on those articles published in the past two years.

### **Elsevier Current Opinion - Current Opinion in Immunology**

Cellular differentiation is the process where a cell changes from one cell type to another. Usually, the cell changes to a more specialized type. Differentiation occurs numerous times during the development of a multicellular organism as it changes from a simple zygote to a complex system of tissues and cell types. Differentiation continues in adulthood as adult stem cells divide and create ...

Scope & Mission. *Frontiers in Molecular Neuroscience* publishes rigorously peer-reviewed research that aims to identify key molecules underlying the structure, design and function of the brain across all levels. Specialty Chief Editors Robert J. Harvey at the University of the Sunshine Coast, Queensland, Australia, and Jochen C. Meier at the Technische Universität Braunschweig, Germany, are ...

### **Frontiers in Molecular Neuroscience**

*Microbial Cell (MIC)* emerges as a peer-reviewed publishing platform for high-impact research that uses unicellular organisms (and multicellular microorganisms) to understand cellular responses to internal and external stimuli and/or human diseases. *MIC* articles are archived *MIC* publishes articles of extraordinary novelty and significance, including research papers and reviews that cover ...

Biology4Kids.com! This tutorial introduces the digestive system. Other sections include cells, plants, invertebrates, and vertebrates.

### **Biology4Kids.com: Animal Systems: Digestive System**

Research Interests. The department combines expertises in techniques of Biochemistry, Electrophysiology, Molecular Biology, Cell imaging, Proteomics, Bio-informatics and Animal-model development to acquire novel insights into cellular signaling and communication processes.

### **Department of Cellular and Molecular Medicine**

South Coast AQMD regulation that presents enforceable standards for each specific source of air pollutants which form the basis for permit operating conditions.

### **Regulation XI - Source Specific Standards**

Nicotinamide adenine dinucleotide (NAD) plays a very critical role in a wide range of cellular reactions. The conversion of NAD from its oxidized form (NAD<sup>+</sup>) to its reduced form (NADH), and back, provides the cell with a mechanism for accepting and donating electrons. NAD<sup>+</sup> /NADH plays a significant role in the reactions associated with glycolysis, oxidative phosphorylation, and fermentation.

### **Nicotinamide Adenine Dinucleotide - an overview ...**

Pyramidal cells are distinguished by their prominent apical dendrite and basal dendritic tree (Figure 3). They comprise ~70–90% of all neurons in cortex. Pyramidal cells form rich plexuses of connections, often called intrinsic lattices or horizontal patches, within cortical areas. They form nearly all corticocortical connections, both ipsi- and contralateral, as well as most subcortical ...
