Dental Hygiene and Dental Therapy, BSc (Hons ...

Dental floss (or simply floss) is a cord of thin filaments used to remove food and dental plaque from between teeth in areas a toothbrush is unable to reach. As the build-up of plaque between the teeth is the primary cause of dental disease, such as gingivitis and dental caries, the use of floss is commonly recommended in order to prevent these conditions from developing.

Dental floss - Wikipedia

Tooth decay, also known as dental caries or cavities, is a breakdown of teeth due to acids made by bacteria. The cavities may be a number of different colors from yellow to black. Symptoms may include pain and difficulty with eating. Complications may include inflammation of the tissue around the tooth, tooth loss, and infection or abscess formation.. The cause of cavities is acid from ...
