1. Looking at Abnormal Behavior The program visits the Jackson Memorial Hospital Crisis Center in Miami, where suicidal, depressed, and schizophrenic patients meet with psychologists, psychiatrists, and social workers to assess the nature and seriousness of their problems.

Resource: The World of Abnormal Psychology - learner.org

Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena ex. neural circuits). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains ...

Psychology - Wikipedia

Discovery is the act of detecting something new, or something previously unrecognized as meaningful. With reference to sciences and academic disciplines, discovery is the observation of new phenomena, new actions, or new events and providing new reasoning to explain the knowledge gathered through such observations with previously acquired knowledge from abstract thought and everyday experiences.

Discovery (observation) - Wikipedia

Science is the field of study concerned with discovering and describing the world around us by observing and experimenting. Biology, chemistry, and physics are all branches of science.

In primates (including humans), one convenient way to study information-seeking is the k-arm bandit task (Gittins and Jones, 1974; Figure 2). In this task, decision-makers are faced with a series of choices between stochastic reward (Whittle, 1988). The optimal strategy requires adjudication between exploration (sampling to improve knowledge and, therefore, future choices) and exploitation ...
