Stellar-mass black holes The most common black holes form as the result of a supernova, the catastrophic death of a massive star. Most stellar-mass black holes are roughly five to ten times more massive than our sun, but NSF's Laser Interferometer Gravitational-Wave Observatory (LIGO) has detected several with masses up to 100 times that of our sun.

If there's one lesson we truly took to heart from our time in comedy school, it's that you should never, ever, ever ever, lead off a comedy article with an entry about child sacrifice. So anyway, Capacocha was an Incan child sacrifice ritual in which only the utmost beautiful of children were chosen to trek to the top of an Andean mountain and freeze to death in order to please the gods.
