

## *Making The Mirv*

### **Making The Mirv**

A multiple independently targetable reentry vehicle (MIRV) is a missile payload containing several warheads, each capable of being aimed to hit a different target. The concept is almost invariably associated with intercontinental ballistic missiles carrying thermonuclear warheads, even if not strictly being limited to them. By contrast, a unitary warhead is a single warhead on a single missile.

In 1939, Stalin and Hitler plunked two straws into a single milkshake and became best buds forever when they signed the Treaty of Non-Aggression Between Germany and the Soviet Union. Then, in 1941, Hitler got a memo reminding him that he was an evil a\*\*\*\*\*e (he knew he'd forgotten something), so he dropped everything and rushed off to go break the pact.
