Managerial Economics And Financial Analysis

Managerial economics deals with the application of the economic concepts, theories, tools, and methodologies to solve practical problems in a business. In other words we can say that managerial economics is the combination of economics theory and managerial theory. It helps the manager in decision making and acts as a link between practice and theory".

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and ...
