Solving Systems of Equations Real World Problems. Wow! You have learned many different strategies for solving systems of equations! First we started with Graphing Systems of Equations. Then we moved onto solving systems using the Substitution Method. In our last lesson we used the Linear Combinations or Addition Method to solve systems of equations.. Now we are ready to apply these strategies to ...

Systems of Linear Equations -- Two Variables (A)

Dynamical systems theory is an area of mathematics used to describe the behavior of the complex dynamical systems, usually by employing differential equations or difference equations. When

differential equations are employed, the theory is called continuous dynamical systems. From a physical point of view, continuous dynamical systems is a generalization of classical mechanics, a generalization ...

In this section we'll take a brief look at a fairly simple method for approximating solutions to differential equations. We derive the formulas used by Euler's Method and give a brief discussion of the errors in the approximations of the solutions.
