It is our personality that makes us who we are, but how exactly do our personalities form? Personality development has been a major topic of interest for some of the most prominent thinkers in psychology.

5 Major Theories of Personality Formation - Verywell Mind

Two studies explored the role of implicit theories of intelligence in adolescents' mathematics achievement. In Study 1 with 373 7th graders, the belief that intelligence is malleable (incremental theory) predicted an upward trajectory in grades over the two years of junior high school, while a belief that intelligence is fixed (entity theory) predicted a flat trajectory.

Study Guides for Psychology Students - Simply Psychology

Freud: The Beginning. Sigmund Freud more-or-less started the whole issue about repressed memories when his clinical case studies in the late nineteenth century inspired him to develop his psychological theories about the nature of unconscious mental processes. He used the term repression to describe the way emotionally painful events could be blocked out of conscious awareness so that their ...
